2007 Dryland Drought Relief Program

All-Tex Seed is pleased to announce the 2007 Drought Relief program for cotton grown in West Texas, Oklahoma, Kansas, and New Mexico (seed drop zone E) for the 2007 growing season.

This offer will support a grower's decision to plant high quality All-Tex Seed cotton seed containing advanced technologies that help achieve the best yields possible. The All-Tex Seed program will also aid in reducing financial risk from crop loss due to drought when choosing the following products.

*** All-Tex B2RF, RR Varieties ***

All-Tex Seed

Dryland Drought Relief Program for Seed Drop Zone E

To Qualify:

In the event of a dryland drought, a grower whose cotton crop is lost or yields less than 150 lbs. of lint per planted acre will qualify.

Grower Refund:

50% of suggested retail price will be refunded for **All-Tex B2RF** cottons.

100% of seed **All-Tex RR** will be refunded in seed **only**. A voucher will be supplied to the dealer who sold original seed. Seed will be delivered to same dealer in the farmers name in April 2008.

The Dryland Drought Relief Program applies only to crop losses and/or specified yield reductions incurred **due to drought conditions**. Losses or yield reductions due to other conditions or perils such as diseases, pests, hail, wind, etc., are not eligible for this offer.

For details on the Cotton Technologies Drought Relief Program refer to Monsanto's 2007 Roundup Rewards® Brochure.

Claims must be submitted to All-Tex Seed no later than January 15, 2008. Program will be discontinued thereafter.
