

## 2016 CROPLAN<sup>®</sup> COTTON REPLANT PROGRAM

### **CROPLAN<sup>®</sup> Cotton Replant Policy – All Zones**

If within 60 days after planting during the 2016 growing season, a grower experiences less than adequate stand, or crop loss that requires a replant, and the following conditions are met, then the grower will qualify for 100% coverage of the invoice price/grower price of the CROPLAN<sup>®</sup> germplasm.

### **PROGRAM CONDITIONS:**

The CROPLAN<sup>®</sup> cotton seed must have been purchased during the 2015-2016 market year. Seed purchased in previous years by retailer or grower is not eligible.

Program applies to all acres planted with CROPLAN<sup>®</sup> cotton seed only, and is offered for the first replanting of the season and does not cover multiple replant situations.

Loss must occur within 30 days of final planting.

Growers must use sound farm best management practices, and make every attempt to establish a stand and produce a crop.

This program covers replants resulting from eligible crop being destroyed by an act of God; limited to hail, wind and/or flooding events only. Insufficient stand loss due to soil crusting, cold temperatures and disease are covered with demonstration of acceptable seeding rate, weed control and other acceptable farming practices. Dry soil conditions are not covered under the replant program.

Growers seeking replant program coverage should contact the dealer before tilling or replanting any field associated with the program.

An authorized CROPLAN<sup>®</sup> seed sales representative or dealer must be contacted within 30 days of original planting date and must verify claim and complete any and all documentation prior to replanting in order to be eligible for reimbursement.

Any reimbursement will be made to the dealer in the form of a credit.

Seed must be planted before June 15, 2016 to be eligible for replant credit.

CROPLAN<sup>®</sup> cotton seed replant claim is submitted by July 15, 2016. Replant claims received after this date will not be eligible for reimbursement.

CROPLAN<sup>®</sup> makes no warranty or guarantee regarding availability of specific varieties for replant purposes.

**Monsanto Replant Technology Fee Refund:** Grower must contact their local Monsanto sales representative for any Bollgard II<sup>®</sup> and/or Roundup Ready<sup>®</sup> Flex fee reimbursement claims.

**Syngenta Premium Seed Treatment Refund:** You must contact your Syngenta Seed Care representative for any Syngenta premium seed treatment reimbursement claims.
