

2016 CROPLAN[®] Drought Relief Policy - Seed Drop Zone D & E Only

OFFER:

If due to drought, a certified dryland CROPLAN[®] cotton crop is planted, and harvested yields less than 175 lbs. of lint per acre, WinField will credit the retailer 50% of the suggested retail price of the CROPLAN[®] germplasm only.

If due to drought, a certified dryland CROPLAN[®] cotton crop is planted and is *NOT* harvested and yield as estimated on a crop insurance claim form is less than 175 lbs. of lint per acre, WinField will credit the retailer 25% of the suggested retail price of the CROPLAN[®] germplasm.

Program is valid only for the 2016 crop year in Monsanto's published Seed Drop Rate Zone D (which includes certain East Texas counties) and Zone E (which includes the states of OK, NM, KS and certain West Texas counties). Please contact your local dealer to confirm geographical eligibility.

See Monsanto's Genuity[®] Cotton Traits Drought Program for Technology Fee refund.

PROGRAM CONDITIONS:

Program is valid only for CROPLAN[®] cotton seed purchased during the 2016 crop year program and covers certified dryland acres only. Program applies only to crop losses and/or yield reductions due to drought conditions. Losses or reductions due to other conditions or perils, such as disease, pests, hail, wind, etc. are not eligible under this program.

An authorized CROPLAN[®] seed sales representative must inspect potential claims while the crop is still in the field and has the right to reject without settlement on any potential claim not inspected before harvest. A CROPLAN[®] seed sales representative must verify claim and complete any and all documentation prior to filing claim in order to be eligible for reimbursement.

Final deadline for submitting claims in Zone D is November 4, 2016 and for Zone E is January 6, 2017.

Claims must include Federal Crop Insurance Claim detailing drought as cause of crop loss and that actual harvested or estimated yield is less than 175 lbs. per acre due to drought on dryland cotton acres. A FSA 578 form certifying acres as dryland or non-irrigated, proof of purchase, and production record if harvested is also required to be eligible for reimbursement.

Program only covers cost of germplasm. Added seed treatment costs are not included. The grower will need to work with retailer and Monsanto for any drought relief programs related to herbicide and/or insect tolerant traits.

Settlement for seed will be issued via credit to the retailer upon approval of claim and corresponding sales reported for the farm.
