# 2016 COASTAL CROP LOSS AND DROUGHT RELIEF PROGRAM (COTTON ONLY)

## Claims Process

- Cotton Crop Loss claims must be submitted by the regional deadlines listed on the map to the right. Only Monsanto traits that are lost within 60 days of planting are eligible for Cotton Crop Loss.
- Stand reductions and/or yield loss after the first 60 days due to conditions or perils such as disease, pests, hail, etc shall not be covered under a Crop Loss claim.
- A Monsanto authorized representative, authorized retailer or seed supplier where purchase originated or approved designee must inspect and verify grower's seed loss, replant/crop loss. A claim report must be filed for each claim.
- Seed grown for production may not be eligible for replant refund. Refer to your seed production contract for details.

Replant deadline - July 29, 2016

## Drought Relief Program Conditions

- Program valid only for the 2016 crop year in Monsanto's published Seed Drop Rate Zone D (which includes certain East Texas counties) and E (which includes the states of OK, NM, KS and certain West Texas counties). Please contact your local dealer to confirm geographical eligibility.
- Program applies only to crop losses and/or specified yield reductions on acres planted with qualifying traits and incurred due to drought conditions on certified dryland cotton acres. Losses or reductions due to other conditions or perils, such as diseases, pests, hail, etc., are not eligible.
- Program benefits are limited to published technology fees for qualifying traits. Added seed treatment costs are not included.
- Final submission for Drought Relief in Zone D is November 4, 2016, and for Zone E is January 6, 2017.
- Payment is contingent upon approved claim and corresponding sales reported for the farm.
- Monsanto reserves the right to audit dealer sales and claims at any time.
- The cotton crop is considered a loss if the actual or estimated lint yield is less than 175 lbs. per land acre due to drought on certified dryland cotton acres. Grower must provide proof of Federal Crop Insurance claim of an estimated yield less than 175 lbs. of lint per land acre and drought is the primary cause contributing to 50% or greater of the claim damage under the Multiple Peril Crop Insurance coverage for the affected areas. Total eligible acres equal the grower's reported acres planted with cotton varieties containing Monsanto cotton traits for the USDA or Federal Crop Insurance.
- If crop planted to Deltapine cotton yields less than 175 pounds of lint per land acre due to drought, and the grower harvests the field and has documentation to verify harvest, grower will qualify for 50% of the suggested retail price of the Deltapine germplasm and 100% of the cotton trait fee.
- If crop planted to Deltapine cotton yields less than 175 pounds of lint per land acre due to drought, and the grower does not harvest the field, grower will qualify for 25% of the suggested retail price of the Deltapine germplasm and 100% of the cotton trait fee.
